

PROFESSIONAL BIOGRAPHY

As CEO and Founder, Gary quickly built Mobilitie from an idea into the fastest-growing owner and lessor of wireless telecommunications infrastructure assets in the United States. With over 25 years of experience in the wireless industry, Gary is focused on addressing the increasing demand for wireless data and the developing market need for wireless infrastructure, and is passionate about delivering precisely what mobile operators and venue owners need and want.

Over the course of the past decade, Gary has established a diverse portfolio of assets comprised of cellular towers, Distributed Antenna Systems and Wi-Fi networks. His team has moved quickly to remove carriers' capital constraints and rapidly address their key performance metrics. This enabled Mobilitie to become the leader in today's nationwide deployment of the largest and most complex Distributed Antenna Systems (DAS) and Wi-Fi networks.

Prior to establishing Mobilitie in 2004, Gary was Partner at Deloitte & Touche and the firm's Partner-in-Charge of Wireless Real Estate and Infrastructure. During this time, Gary oversaw the negotiation of over \$10 billion of telecommunications infrastructure assets on behalf of all major U.S. based wireless carriers. He also led the firm's National Practice for Capital Projects Advisory Services, and advised Global Fortune 100 firms on the efficient deployment of their capital.

Today, Mobilitie is positioned with aggressive plans to deploy the most advanced wireless infrastructure at the most prominent venues in the world.
